Full Stack Laravel Developer building multi-tenant SaaS platforms, ERP modules and e-learning systems end to end, from client requirements through to production deployment. Sole developer on four live systems in production, working in PHP, Laravel, MySQL and REST APIs, with a focus on transactional correctness and payment integrations. Works spec-first with an AI-assisted workflow (Claude Code) for implementation and review.

Technical Skills

- **Core (production):** PHP 8, Laravel 10/12, MySQL, Eloquent, REST APIs, multi-tenancy (database-per-tenant), database transactions and row locking, Blade, JavaScript, Bootstrap, PHPUnit, Git, Linux VPS administration (CyberPanel, OpenLiteSpeed, SSL).
- **Integrations:** Paymob (Unified Checkout, HMAC-SHA512 verification), VdoCipher, Twilio WhatsApp, Sanctum-authenticated service-to-service APIs.
- **Also worked with:** React, Angular, TypeScript, Node.js, Express, Nest.js, MongoDB, Firebase, Python (machine learning).

Professional Experience

Hunt ERP

Full Stack Laravel Developer

Cairo, Egypt

08/2025 - Present

- Built a **multi-tenant clinic management platform** from scratch (Laravel 12, database-per-tenant): appointment scheduling with conflict and daily-capacity checks enforced by transactions and row locks, public booking with capacity holds, patient portal, prescriptions, invoices and reports, Arabic/English. Onboarded roughly 10 clinics. [\[Live\]](#)
- Built the **ZMK e-learning ecosystem**: 3 integrated systems, around 75 features. Student site and admin dashboard from scratch, plus an E-Learning module and two-way integration inside the client ERP. VdoCipher playback with per-student watermarking, direct browser-to-VdoCipher upload with progress, quizzes, exam variants with attempt limits, progress tracking, rewards, email OTP, 4 payment flows and 9 automated email types. [\[Live\]](#)
- Turned the core ERP modules into a **SaaS subscription product** for small shops: database-per-tenant provisioning, subscription lifecycle (trials, grace periods, renewals that preserve remaining time), module licensing enforced by middleware, per-user licensing, and idempotent extra-seat purchases using a transaction, a row lock and a unique external reference. [\[Live\]](#)
- Built the **Paymob payment integration** for the company website: Unified Checkout intentions, HMAC-SHA512 signature verification with constant-time comparison on both the browser return and the server webhook, and REST-API activation of subscriptions, modules and extra users across two downstream systems.
- Set up and maintain the production server (VPS, CyberPanel, OpenLiteSpeed, MySQL, SSL). Delivered enhancements and bug fixes across the Accounting, HR, Inventory, CRM and POS modules.

Projects

Offline Desktop Business Applications

Side project, 3-person team

07/2026 - Present

- Built a reusable offline desktop foundation (Laravel 12, NativePHP/Electron, SQLite) and shipped three products on it: a retail POS, a gym management system and a gaming-lounge manager. [\[GitHub\]](#)
- POS: around 480 PHPUnit tests, 13 reports, all money and stock writes funnelled through single services inside transactions, customer payments allocated to oldest invoices first. **Deployed in 2 retail shops.** Gym: 213 tests, barcode membership cards and check-in, subscription freezing and renewal.
- Implemented offline licensing: RSA-2048 signed, machine-bound keys with tolerant hardware fingerprinting, clock-tamper detection, consistent SQLite hot backups and a dependency-aware data reset.

Education and Training

Benha University

BSc in Computers and Artificial Intelligence

GPA 3.33 (84.6%). Graduation project: Smart Glasses for the Blind using machine learning, grade A+.

Egypt

2019 - 2023

Information Technology Institute (ITI), New Capital

Full Stack Development, Open-Source Track (intensive training)

Egypt

03/2025 - 08/2025

Certificates and Languages

- **Certificates:** Back End Web Development Diploma, Route Academy (2024); Full-Stack Web Development Bootcamp, Udemy (2023); Object-Oriented Programming with C++ (2023).
- **Languages:** Arabic (native), English (B2), German (A2).
